

# Front End Developer

## HTML Framework / Angular / React

### Job Summary

Working alongside the backend development and design team, and using an existing set of UX wireframes, you will be creating the HTML framework and a single page application using Angular or React.

### Key Responsibilities

As a front end developer, you will work across a wide range of projects as part of a multi-disciplinary team. In doing so you will:

- Work collaboratively in a team to build a best practice approach to front end development for sophisticated and complex enterprise software
- Work with customers to review and interpret external customers' business requirements and high-level software specifications
- Produce clean, efficient code based on specifications
- Develop accurate and fully documented code that:
  - delivers the requirements of the product
  - complies standard company procedures and methodologies
- Work effectively following agile methodology, take part in team scrums and code reviews to provide and receive feedback effectively
- Take ownership and manage your own time and plan tasks with the team
- Design, develop, test and maintain business systems
- Escalate issues and find solutions to problems
- Support core systems as part of the wider support team including responding to tickets according to SLA's
- Provide excellent customer service

## Experience

- 5 years' experience as a front end developer
- Demonstrable competence and confidence in completing front end development specifically with Single Page Applications and web applications.
- UX / UI - An appreciation of the importance of design and customer experience is key to being successful in your role
- Experience of supporting and working with colleagues in sub-teams
- Demonstrative experience of delivering projects within allocated timescales
- Understanding of Agile

## Skills

Experienced and skilled in:

- Expert with HTML5, CSS3 and writing cross-browser compatible code
- Latest versions of Angular or React
- Expert level understanding of modern JavaScript frameworks
- Expert with JavaScript and TypeScript
- Experience with CSS precompilers like Sass and LESS
- Experience with NodeJS, Grunt, NPM

## Personal Skills

- Passion for digital technologies and how they are changing the way we live and work
  - Good communication skills – written and oral – with the ability to listen and understand requirements and communicate complex technology to non-technologically minded individuals
  - Excellent attention to detail
  - Committed to producing high quality work
  - Ability to work on own initiative and within a team
-
